

BLUE MATTERS
moving to zero

BERGE BULK'S BLUE MATTERS ENVIRONMENTAL SUSTAINABILITY GOALS

At Berge Bulk we believe that preserving our planet's resources is fundamental to our current and future sustainability and success as a business. Environmental conservation thus plays an integral role in our journey to becoming one of the world's leading companies. Our Blue Matters environmental sustainability strategy is a declaration of our present and future commitment to the environment. It provides a unifying vision to guide the actions of the company's employees, management, customers, suppliers and other stakeholders. This year's update to Blue Matters is marked by continued evolution and even more pioneering ambition.

EMISSIONS

Our Ambition

- Achieve net zero carbon emissions by 2025
- Build and operate a zero emissions vessel by 2030
- Achieve zero emissions fleet-wide by 2050
- Convert 100% of lightbulbs onboard to LED by end of 2020

WASTE

Our Ambition

- Upgrade water purification units on all vessels in 2020 to reduce reliance on plastic water bottles
- Achieve 25% reduction in average plastic waste per ship by 2021 (vs. 2017 baseline)
- Achieve 10% reduction in average food waste per ship by 2021 (vs. 2017 baseline)

BIODIVERSITY

Our Ambition

- Zero incidents of non-compliance with ballast-water regulation
- Zero spills

SUPPLY CHAIN

Our Ambition

- Ensure at least 80% of our key suppliers are sustainably certified (ISO 14001 or similar) by 2021

SHIP RECYCLING

Our Ambition

- Maintain up-to-date Inventory of Hazardous Materials on 100% of vessels
- Recycle all end-of-life ships at yards that adhere to the Hong Kong Convention by the end of 2021
- Fund at least one local charitable organisation in South Asia that supports ship recycling workers and their families
